Eye of the Storm -
Health and Wellbeing seminar

A one-day, multi-sector health and wellbeing seminar for service planners and practitioners working with children, young people and families.

This is a time of unprecedented change for health services and those working with children, young people and their families. Local health service design and delivery is going through a radical overhaul. At the same time those working with children, young people and families are also experiencing significant reductions in funding, forcing them to reconfigure services and their workforce at a time of growing need.

This seminar will also contain a selection of practical workshops which will both inform and challenge practice and organisational opportunities. The event will bring together commissioners, managers and practitioners across the voluntary and state sectors to learn, share and network.
